

Three Parent Testimonials

From the moment we entered HJC we knew this was the school for our children. The teachers provided a foundation for our children far exceeding our expectations. We are forever grateful to the amazing teachers and directors at HJC.

When our oldest daughter turned 2, choosing a preschool was easy. Everyone we trusted said "Go to HJC." After a tour with the school's director, seeing the facility and meeting the teachers, it was easy to see why. For the next four years, both of our children gained a love of learning in a warm, caring environment. They learned to be social and made lasting friendships! Some of our closest friends are parents we met while our children attended HJC. Anyone looking for a place for their preschooler to grow and learn should explore HJC and see why there's no better choice!

HJC was my second home for almost 10 years- from when my first child started Mommy and Me to when my youngest completed Kindergarten enrichment. What an amazing second home it is! It has simply been one of the greatest blessings in my kids' childhood and in my journey as a parent of three young girls. There are so many great things that make HJC the wonderfully rich environment it is-from the classrooms full of creative play, song and learning, to the science, cooking and art enrichment extended-day offerings. The staff couldn't be more loving and more invested in the lives of every child there. They are superb educators who put 110% in all that they do. From lively, creative lessons, to navigating the nuances of socializing with their peers, my children were gently guided to be creative, charitable people while at the same time expertly prepared academically for primary school. The staff have the utmost respect for children and childhood. HJC's philosophy of "Learn through Play" is simply the best. Along with all of the love and education HJC has given to my my children, I can't count how many times over the years the staff made themselves available to me for a bit of parenting advice, perspective or just a hug. I honestly could not imagine a better, more special place for my children to have spent their early childhood. An absolute gem of a school!
